
Input Validation Issue - Part 2

1. The objective is to try to access any sensitive information apart from a web URL.
2. The main idea of the lab is to bring the image via URL that I provide it.

3. I tried to give it link for my webhook. Unexpectedly, he visits it. I noticed that he doesn't validate my input and he will visit any link I will provide him with it.

The screenshot shows a web application interface. At the top, there is a text input field containing the URL: `webhook.site/ade9259c-50ea-4188-a604-f663a967d9f8`. Below the input field is a grey button labeled "VIEW". Underneath the button, a message is displayed: "This URL has no default content configured. [Change response in Webhook.site](#)."

GET	https://webhook.site/ade9259c-50ea-4188-a604-f663a967d9f8
Host	45.245.144.30 Whois Shodan Netify Censys VirusTotal
Location	EG Al Khankah, Al Qalyubiyah, Egypt
Date	11/15/2025 2:25:23 AM (a few seconds ago)
Size	0 bytes
Time	0.001 sec
ID	f1e1e2e3-1bf7-4799-aaa0-22586ede0ff0
Note	Add Note

4. I tried to access internal files and read it, and I read it successfully.
