# *Hardcoding Issues – Part 1*

---

1. The objective is to find out what is hardcoded and where.
2. After decompilation of the apk file and observing the code, I found the vendor key hardcoded in the code.

```
public void access(View view) {  
    EditText hkey = (EditText) findViewById(R.id.hcKey);  
    if (hkey.getText().toString().equals("vendorsecretkey")) {  
        Toast.makeText(this, "Access granted! See you on the other side :)", 0).show();  
    } else {  
        Toast.makeText(this, "Access denied! See you in hell :D", 0).show();  
    }  
}
```
