## ***Unprotected admin functionality***

---

1. This lab has an unprotected admin panel.
2. First, I tried to navigate to `/admin`, but it was not found. So, I tried to navigate to `robots.txt` file and I already found the admin page called '`/administrator-panel`'.
3. I opened it and I already have access to open it, and I can delete users.
4. When I deleted carlos, the lab solved.

Unprotected admin functionality
